Michael Scantlebury	22 <sup>nd</sup> July 2021	\$0.34/sh ▲ from \$0.30/sh

### JunQ: Halls Creek steady, Norseman progressing

#### Event

Pantoro Limited (PNR) released its JunQ report, highlighting production of 8.9koz at a reported AISC of A\$1,570/oz.

#### Impact

Production was inline with guidance of 9.0koz (+/-10%) at an AISC between A\$1,500 - \$1,750/oz.

The Company finished the quarter with a **strong net cash position of A\$49.2m** which is down A\$5m, after spending A\$6.1m at Norseman.

- The Company has maintained production guidance at Halls Creek mine at ~9koz at AISC of A\$1,550-1750/oz for the SepQ and DecQ, we continue to assume production inline with guidance.
- A slight increase to both the Valuation and Price target due largely to the incorporation of a relatively small proportion of higher grade Mainfield ore (Crown Reef) into our production profile, given the recent drill success.

#### Action

We maintain our Speculative Buy Recommendation, increasing our Valuation and Price Target to: 24cps (22cps previously) and 34cps (30cps previously) respectively.

#### Key Catalysts

- Ongoing exploration results from Norseman with 6 drill rigs currently active.
- Debt financing (we assume A\$30m is secured 2H CY21).
- Norseman approvals, allowing construction to commence.
- Gold price and market sentiment.

## Analysis

- The Company processed 58.8kt at 5.0g/t in the JunQ producing 8.88koz, compared to the MarQ 55.3Kt at 5.0g/t and 8.4koz.
- The Company finished the quarter with a strong cash position of A\$49.2m (no debt) which is down A\$5m, after spending A\$6.1m at Norseman.
- PNR is currently debt-free but we assume will be able to secure a debt facility of A\$30m in 2H CY21 to fund PNR’s capex share of the Norseman capex which is A\$45m.
- We note that PNR’s Norseman’s gold project JV partner Tulla resources (TUL.asx) continues to contribute on a 50% basis into the JV.
- As a reminder PNR’s Norseman DFS (Oct 2020), showed a 6-year mine life at -110kozpa (-50koz attributable) with significant potential for growth, first gold is scheduled for early CY22.
- We now assume a production profile at Norseman that incorporates a small proportion of higher grade ore feed coming from Mainfield (Crown Reef) in CY24 and CY25.
- The introduction of higher grade ore feed has lifted production both CY24 and CY25 to -62koz and -66koz respectively which is ~20% above PNR’s DFS production profile (see chart below).
- We note that if approvals are delayed further it may have an impact on first production which is currently scheduled for early CY22. The Company expects approvals to be granted during this quarter.
- We reiterate that if PNR is able to consolidate the ownership of the Norseman Gold Mine at some point, then we believe it would unlock significant value for all stakeholders.
- Over the medium to long term we see potential for the Norseman mill to be expanded to 1.5Mtpa from 1.0mtpa for only modest capex, which would enable production of +150kozpa (+75kozpa attrib) assuming its largely filled from high grade underground ore feed.

## Our Share Price Sensitivity

## Our Market Sensitivity

Valuation - \$0.24/sh  
Target Price - \$0.34/sh

### Bull Scenario - \$0.50/sh

A\$ gold price rises a further 20% on our long-term A\$2,360/oz assumptions. The Company is able to expand the Norseman mill to 1.5mtpa and extend the high-grade underground mineralisation maintaining production above +130kozpa (100%).

### Base Scenario - \$0.34/sh

The Company is able to smoothly ramp up its Norseman gold operation as per the DFS with the introduction of higher grade Mainfield ore in CY34 and CY25, gold price remaining at current levels. We assume they will be able to extend the high-grade underground production adding and additional 2 years to the mine life.

### Bear Scenario - \$0.05/sh

A\$ Gold prices fall 30% and the Norseman gold project has commissioning issues running overbudget. The Norseman LOM plan fails to reconcile with actuals resulting in higher opex and or lower production. Additional equity is required to reduce Balance Sheet risk. LOM is not extended beyond the mine plan.

## Company Summary

Pantoro Ltd (PNR) owns the Halls Creek gold mine in the Kimberly which produces modest production of ~36koz pa, however the markets eyes are firmly focussed on its 50% owned Norseman gold project PNR represents a rare opportunity for investors, to buy into one of the last remaining historical production hubs in WA at a decent valuation. Near term catalysts include further exploration results along with the finalisation of a financing package to get Norseman back into production, we estimate first gold in early CY22.

## Disclaimer

The projections and information above is based on the set assumptions outlined. Due care and attention has been used in the preparation of this information. However actual results may vary from forecasts and any variation may be materially positive or negative. Forecasts by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Euroz Hartleys.
